## **DETAILED ACTION**

### ***Specification***

1. The disclosure is objected to because of the following informalities: the status of the parent case 09/997,930 should be updated.

Appropriate correction is required.

### ***Claim Objections***

2. Claims 22-24 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. These apparatus claims are dependent upon cancelled claims, 1, 6, and 10, respectively. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Presently, claims 22-24 have been withdrawn from consideration.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 18 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Line 2, "ones" lacks antecedent basis. It is suggested that "ones" be replaced by --wafers--.

### ***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3651

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

6. Claims 18-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Reyes et al. 6,599,763.

Reyes '763 discloses a fabrication method per claimed invention. The method comprises transporting individual wafers within a processing tool with multiple processing chambers and randomizing the wafers within a lot.

In regards to claims 19-21, Reyes '763 process provides the step of correlating fault and/or parametric data with process sequence data resulting from the randomizing step, and controlling process parameters accordingly (Figure 4).

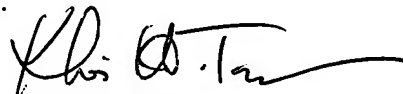

### ***Conclusion***

7. Additional references made of record and not relied upon are considered to be of interest to applicant's disclosure: see attached USPTO Form 892.
